

SORB[®]XT STRIPPER

SORB[®]XT Stripper is easily and quickly biodegradable, easy to use and free of any environmental toxins

SORB[®]XT Stripper works on the basis of benzyl alcohol, water and penetrating oil. It "cracks" and neutralizes all coatings in which carbon chains are present - except for the mineral substrate.

Available in the sizes:

- 10,00 kg - article-no.: 100824
- 20,00 kg - article-no.: 100825

PROPERTIES

- the material is moist and plastic
- neutral PH-value
- low odour, colored
- non-toxic
- strongly degreasing
- pasty, of stable consistency, also in the overhead area
- water-dilutable (5%-40% water)
- decoats all substances with plastic chains up to a thickness of 3cm, even difficult ones like 2K-coatings or even asbestos

APPLICATION AREA

- plastic decoating system
- paint decoating system
- pollutant removal
- preparatory corrosion protection

ADVANTAGES

- more efficient working time
- up to 500m² possible in one day
- easier disposal
- no release of pollutants
